

BEAR HACK!

TUESDAY APRIL 9TH
5:30 TO 9:00 PM

NORTHLIGHT INNOVATION
2180 2nd Ave.

► We are seeking ideas from creative Yukoners to help reduce human-bear conflict.

Wild Wise Yukon has been working for several years on ways to reduce conflicts between humans and bears. Some problems don't seem to go away and we are looking for your help!

CHALLENGE: Is there a cost-effective way to retrofit existing Whitehorse garbage or compost carts to make them bear-resistant?

CHALLENGE: Many Yukon homes lack a garage or shed to store garbage safely. Is there a cost-effective way of designing bear-resistant storage? Perhaps big enough for polycarts?

CHALLENGE: How would an early warning alarm system for unattended picnic coolers work?

CHALLENGE: Some homeowners with a garage choose not to store their garbage (e.g. polycarts) inside their garage. Can we find out why and solve the problem or change the behaviour?
